Diabetes Detection Clinic April 27

At the site of Virginia commemorative marker, seated from left, State Senator Howard Anderson and Congressman W. C. Daniel. Standing from left, Mrs. Frank Brown, President, South Central District, Mrs. J. D. Allen, Jr., President of VFGC, Mrs. K. B. Stoner, State Chairman, Historic Preservation, William Hunter, ACWCC representative, Mrs. C. T. Moses, Jr., District Chairman, Historic Preservation and the Honorable Mills E. Godwin, Jr., Governor of Virginia.

A diabetes detection clinic, sponsored by the Appomattox Health Planning Council is planned for Sun., April 27, 1975, at the new Appomattox County High School for adults. The clinic will be held in the school cafeteria from 1 until 6 p.m.

WHY WAIT? Diabetes does not and it can be detected long before it becomes symptomatic. Acute complications can be minimized by early detection and proper medical control.

WHY WAIT? There is no need! You can and should attend the diabetes detection clinic, a community screening program being conducted April 27.

Following are instructions for your two-hour Postprandial Blood Sugar Test.

It is important to include all the following foods in the amounts listed in the sample meal plan. DO NOT drink (other than water), eat, smoke, chew gum, candy, cough drops, etc., following the meal until the blood sample is taken. If you are a late sleeper and plan to eat breakfast prior to being tested the following menu is suggested: 1 cup orange juice, 1 cup cornflakes or oatmeal, 1 cup milk, 1 tablespoon sugar, 2 slices toast, 1 tablespoon jelly, 1 egg is desired, coffee or tea (without caffeine). For lunch the following meal is suggested: 1 cup orange juice, 1 bowl vegetable soup, 4 saltine crackers, 1 slice lunch meat or cheese, 2 slices bread with butter or margarine or mayonnaise, ½ cup vegetable or salad, coffee or tea (without caffeine), 1 slice or scoop of ice cream.

Finish the meal two hours before the test.

Because a fasting blood sugar test may be misleading, a postprandial test is preferable as a screening test for diabetes detection.

WHY WAIT? Diabetes doesn't. Be tested on Sunday, April 27, 1975. You will be glad you did.

Dog Confinement in Effect

The Board of Supervisors of Appomattox County would like to remind all citizens that the dog confinement period for the county is in effect from April 15, 1975 through June 15, 1975.

All dogs within the county must be confined to the lots of their owners or keepers for a period of 60 days.

According to an announcement this week from the county game warden, dogs have been picked up and they will continue to pick up all dogs found running loose with or without tags. People are just not cooperating with the law regarding dog confinement and if they value their dogs and do not want them "loaded on a truck" and hauled away, they will have to keep them confined!
